

Drive Innovation and Excellence in Data and Analytics for Government. CDAO Government Online 2025 is the premier online event for senior data and analytics leaders across U.S. government agencies.

Join us for a transformative virtual experience designed specifically for government leaders and public sector professionals. Discover cutting-edge strategies in **data-driven decision-making**, **responsible AI implementation**, and **robust data governance**. Learn from industry experts and fellow government innovators as we explore how to harness data and emerging technologies to drive mission success and public trust.

WHAT'S NEW FOR THIS EDITION?

1. **Building trust** through AI, data privacy, and responsible policy
2. **Solve shared problems** with like-minded attendees through our interactive sessions
3. **Data-driven government:** Expert perspectives on the evolving landscape of analytics and innovation in the public sector
4. **AI and Innovation** – Driving positive change in public service through innovation, AI, and creativity
5. **Lead transformation** with actionable insights to solve critical public challenges

CDAO Government Online Key themes:

- Unlocking AI's Potential in the Public Sector: Innovating Ethically for Transformative Impact
- Building Future-Ready Government Data Architectures Through Emerging Technologies
